23. Problem: (use additional Sheets if necessary)
The existing anonymous ftp directive needs to be updated for IRIX 6.5. Also, the ability to log the directory in addition to the filename in syslog has been determined so that automated cleanup can be implemented.

This directive was tested in the PVC during Drop 6A scenarios.

24. Proposed Solution: (use additional sheets if necessary)
Implement the directive on all ECS SGI anonymous ftp servers.

25. Alternate Solution: (use additional sheets if necessary)

26. Consequences if Change(s) are not approved: (use additional sheets if necessary)
anonymous ftp will continue to be broken and automated cleanup will not be possible.

23. Problem: (use additional Sheets if necessary) COURIER BACKUP 4/4/01
As part of the HP migration, install DCE Time Server as directed per the attached TD. Once the HPs are migrated from the ECS baseline the sites will no longer have an uneven number of DT timer servers. The recommended number per site is any odd number. Correction create a scenario where there is an uneven numbe of Time servers. It is the courier's role to update all DTS Servers in the DCE cell. When the primary courier goes down, or is unable to synchronize the server clocks, the backup takes over. It is imperative that a DCE DTS backup courier be configured in the DCE cell.

24. Proposed Solution: (use additional sheets if necessary)
As part of the HP Migration from the ECS baseline several sites will have to correct this problem by creating an odd number of DCE Time Servers. This situation will provide DCE with the correct synchronization algorithm when trying to resync a time servers. The propodes platform for the newly prcedure will be existing SUNs located at the each. SUN at their site.SUN several w/s per site will no longer have install DBVision at /opt/cellmgr as directed per the attached PSR. Update the baseline documentation to reflect change.

25. Alternate Solution: (use additional sheets if necessary)
N/A

26. Consequences if Change(s) are not approved: (use additional sheets if necessary)
The price of non-conformance will be DCE cells unable to resolve DCE Time server synchronization courier issue. This in turn causes a problem when resetting the primary server time at boot-up time.

23. Problem: (use additional Sheets if necessary)
This is a request for an udpate to the PDSIS installation based on a new version of the PDSIS and PDSSA software. Also PDS Hotbackup script and cron changes were made.

24. Proposed Solution: (use additional sheets if necessary)
Deliver the following files: pdsstbackup.sh, pdsitbackup.sh, pdsbackup.sh, PDSIS.JAR, PDSIS_DB_TAR.GZ, PDSIS_FRM_TAR.GZ, PDSIS_OPS_TAR.GZ, PDSIS_TS1_TAR.GZ, PDSIS_TS2_TAR.GZ, and pdssa_v1_0.tar

25. Alternate Solution: (use additional sheets if necessary)
None.

26. Consequences if Change(s) are not approved: (use additional sheets if necessary)
There will be no DVD and CD distribution capability for the Aqua Launch.

27. Justification for Emergency (If Block 15 is "Emergency"):

Title of Change: Authorize the release and installation of a new version of PDS Input Server (PDSIS V 1.0 R2 and PDSSA V 1.0.1) to the DAACs, VATC, PVC, and the EDF

The PDS software delivery contains the following tar files delivered on CD-R: CD-ROM titled PDSSA Installation Media Release 1.0.1, dated 3/30/01 and PDSIS V1.0 R2, dated April 2, 2001.

PDSIS files:

04/02/01	09:56a	194,125 PDSIS.JAR
04/02/01	09:55a	11,579 PDSIS_DB_TAR.GZ
04/02/01	09:55a	520,619 PDSIS_FRM_TAR.GZ
03/30/01	02:04p	1,818,276 PDSIS_OPS_TAR.GZ
03/30/01	02:04p	1,839,411 PDSIS_TS1_TAR.GZ
03/30/01	02:04p	1,841,240 PDSIS_TS2_TAR.GZ

PDSAA files:

04/01/01	04:50p	399,001,600 pdssa_v1_0.tar

ACTIONS:

CM:
Repost the document number 914-TDA-151-Rev 2 Earth Observing System Distributed Information System Core System (ECS) Product Distribution System (PDS) Release Document dated April 2, 2001.

CLEARCASE:
CM extracts the Tar file(s) from the CD-R: CD-ROM titled PDSSA Installation Media Release 1.0.1, dated 3/30/01 and PDSIS V1.0 R2, dated April 2, 2001, along with pdsstbackup.sh, pdsitbackup.sh, pdsbackup.sh, and provides to the SMC.

SMC:
Provide the TAR files that was built by CLEARCASE to the DAACs, PVC, VATC, and the EDF.

DAAC Install Instructions:

Follow the instructions provided in the PSR document 914-TDA-151-Rev 2 Earth Observing System Distributed Information System Core System (ECS) Product Distribution System (PDS) Release Document dated April 2, 2001.

PDS Hotbackup script and cron changes are identified here for quick reference.

A few updates to the hotbackup scripts and cron for PDS.

1. Change the following two lines in oracle's crontab to make
sure there is a space between the {} and the \

```
00 6 * * 1-6 /usr/bin/find /data3/oracle/oracle_backups/hot_backups -mtime
+30 -exec /bin/rm -f {} \;
00 6 * * 1-6 /usr/bin/find /data3/oracle/oracle_backups/archive_logs -mtime
+30 -exec /bin/rm -f {} \;
```

2. Replace the following three files in the
/usr/ecs/OPS/COTS/oracle/SCRIPTS directory:

pdsstbackup.sh
pdsitbackup.sh

ORIGINAL

pdsbackup.sh

3. Verify the permissions on these three files are set to 750 because the files contain the password for Oracle's system user. Also, because of this you obviously need to update the scripts when you change the password for the system user.

23. Problem: (use additional Sheets if necessary)
An ESDT is needed for inserting science software archive packages into the archive. These packages would be tar files of the PGE source code and any required static input files (e.g. Lookup tables). Minimal metadata and services are needed in the descriptor file.

24. Proposed Solution: (use additional sheets if necessary)
We have created an ESDT called PGEPKG that will insert the science algorithm package tar file along with the associated static input files (e.g. Lookup tables). This is an easy way for algorithm packages to be managed. We would like to have this ESDT baselined in the ECS. The maximum size of a PGEPKG granule would be about 2 GB (needed only for MODIS PGE03 whose Lookup tables are unusually large). For most, the sizes would be several MB. The estimated number of granules for MODIS Terra, MODIS Aqua, and AIRS throughout the life of these missions is ~500. Older versions (granules) can be deleted.

25. Alternate Solution: (use additional sheets if necessary)
See Additional Sheet.

26. Consequences if Change(s) are not approved: (use additional sheets if necessary)
Science algorithm packages can not be archived in an easily manageable way.

Title of Change: PGEPKG: Simple, new ESDT for housing science software archive packages

Block 26:

The ECS-delivered SSAP ESDT and the associated SSAP Editor GUI were looked at. One problem is the size limitation imposed by the tool. This limitation was hit when we tried packaging MODIS PGE03 (which has lookup tables approaching 2 GB in total). In addition, the GUI is overly complicated and time consuming to use. It requires the tester to catagorize each component of the package. This would be a significant impediment, particularly when dealing with MODAPS algorithm packages not under GDAAC control for which little is known (the GDAAC is responsible for "passing through" and archiving MODAPS alogorithms when requested from the user community). Given our simple goal of only inserting tar files into the archive, the SSAP functionality is not well-suited.

23. Problem: (use additional Sheets if necessary)
The EcTsClientDriver does not work with patch 5B.07 PDS.04. The Goddard DAAC operations and SSI&T have developed a heavy reliance on the Gordon Brandyburg EcTs tool called the ClientDriver (for SDSRV). Without it we cannot maintain schedule. We need the insert and acquire capabilities it has. ALSO! NOTE! It must be able to assign priority and it must be able to provide SDSRV with a UserString.

24. Proposed Solution: (use additional sheets if necessary)
Add the EcTsClientDriver to the ECS Baseline so it will be maintained by the unsurpassed development team there.

25. Alternate Solution: (use additional sheets if necessary)
We have too much invested in the ClientDriver in the form we use to use alternate solutions that have been discussed.

26. Consequences if Change(s) are not approved: (use additional sheets if necessary)
SSI&T could not maintain schedule.
OPS Distribution would be significantly impacted.
